

Quartz Sleeves

LightSources, Inc. and LightTech Lamp Technology Ltd. make a variety of quartz sleeves and jackets. These products are available in a wide

array of diameters and lengths for use in air purification units, water disinfection units, photochemical reactors, and other specialized equipment. Numerous options are available including open or closed ends, fire polished or saw cut ends, and other custom shapes. They may be applied to a range of lamp types including standard, high output (HO), and amalgam.

Quartz sleeves are of tremendous benefit in that they provide protection for lamps without sacrificing efficiency. Sleeves protect against such common problems as breakage, leakage, temperature fluctuations, and environmental hazards. They are an investment worth making.

Our quartz sleeves provide the following benefits:

- **USEFUL FOR APPLICATIONS IN SMALL SPACES**
- **INNOVATIVE TWO-TUBE LINEAR TECHNOLOGY**
- **TOP QUALITY MATERIALS AND ENGINEERING**
- **CUSTOMIZED, PROPRIETARY DESIGN OPTIONS**

The LightSources/ LightTech Difference

The combined strengths of LightSources in the United States and LightTech in Europe make our companies global leaders in the germicidal lamp industry. We provide our clients in the original equipment manufacturer (OEM) market with standard and customized lamps. In addition to offering all standard lamp sizes, LightSources and LightTech can custom design, engineer, and manufacture the ideal lamps to suit our clients' unique needs. This enables our clients to maintain replacement sales within the OEM market, an often untapped source of tremendous revenue and repeat business.

Our customized, proprietary lamps are unique to the germicidal lamp industry and one of the many reasons that clients have described LightSources and LightTech as companies where customer commitment is second to none. Whatever your needs are in terms of germicidal lamps, LightSources and LightTech have the solution.
